

Communication Designer

I'm interested in illustration, coding and animation. I think that design means to communicate with a universal language of colours, shapes and relationships. I'm national athlete and so I'm in the Dual Career program. I've been practicing racewalking, a discipline of athletics, since 2008 and for this reason I'd like to integrate sport and design. I'm good at team working, keeping in touch with people and organising work.
